

"The World is Listening!"

Latest Construction News

In Madagascar, a 1 ½ mile road and 1 ½ mile of fence has been built and a staff home, guard house, generator building and a few tool buildings have been constructed. The transmitter building which will contain three 100,000 transmitters is almost completed. Those 3 transmitters will soon be shipped to Madagascar and from the diesel powered generators will send the broadcasts from the antennas that are also being built. The towers are up and the wire will begin to be stretched in January 2009. **Three billion shortwave radios throughout the world will bring a potential listening audience of five billion listeners each day. This will enable more people each day than at any time in history to hear the gospel of Christ.**

Readership on our websites is growing. **Millions will read and download pages from our English, Chinese, Russian, African and from our two Arabic websites.** Check our main website often for updates (www.worldchristian.org). You can see the different website addresses, visit them yourself and share them with contacts that you might have from different parts of the world.

We are discussing an opportunity to be able to supply the **tsunami warning signal** for the world from the new station. From the new station, **we will be able to greatly effect the health conditions of the world, the education levels of the world, even the relationships between people with the values we will be able to teach, but most of all the spiritual conditions of literally millions of people.** Continue to pray for this tremendous opportunity to impact the world with the gospel of Jesus Christ.
