

"The World is Listening!"

Reaching More People than at Any Time in History

The mighty hand of God is working in a powerful way through the ministry of World Christian Broadcasting. For the last 25 years from **Station KNLS in Anchor Point, Alaska**, half the world has had the opportunity to hear the gospel everyday with 20 hours of daily broadcasting. Six acres of antenna wire are stretched between three towers 365 feet tall and 385 feet apart, sending out 32 million watts of power. The second antenna finished in 2005 is digital ready, **capable of doing four simultaneous broadcasts**. The two antennas reach about **2/3 of China, 2/3 of Russia and the Pacific Rim countries** with a good strong signal. We have already heard from every country of the world, every state in Mexico and America and every province in Canada. The new antennas will enable more people than at any time in history to have access to the gospel.

We are ahead of schedule with the new station in the Indian Ocean which is being built on 84 acres of land given to us. When completed, as many as 40 hours per day will broadcast from four antennas that we are in the process of building. We will have nine acres of wire standing between four towers each measuring 365 feet by 385 feet in size. **When finished, the continents of Africa and South America, the 25 capital cities of the Middle East, where Arabic is the official language, India, Indonesia, western Russia and southwest China** will all be within our broadcast range.

Check out the World Christian Broadcasting website, www.worldchristian.org, and see the latest pictures, updates and listen to a day of English programming. **Henry Huffard is our new Senior Producer—Africa, and Rex Morgan is our new Senior Producer—Latin America.** God continues to open doors of opportunity to bless the lives of countless millions of people. Thank you for your friendship with this ministry.
